Re: Docket #98N-1038 Irridation...food

Americans have indicated repeatedly their concerns about irradiated food: this means we need to KNOW if it's irradiated. Public Citizen's position on this is also my position, & their arguments are also mine.

We need clear honest labelling on our food. Do not remove our choice and force irradiated food down our throats.

We look to the FDA to protect what we, the people, choose. Please maintain our right to choose.
